Air1 is a very important part of life. They bring uplifting music to millions of people. I listen to Air1 almost everyday at work on my computer or in the car. If Air1 is displaced, I'm afraid that many people would not get the chance to listen to a very important message they have to say. Air1 is very important to the community. Instead of listening to music that tears down, Air1 brings uplifting music to everyone listening. I fully believe that the music Air1 brings to the community is helping cut down on many things like, crime and death. I heard on the air that a women was going to kill herself, but then she heard the DJ on Air1 say something about how important life is, and she stopped. If Air1 is displaced, someone might not hear something vital! Please, Please, Please, do not displace Air1! It is vital for me and for millions of others! Thank you!
